Junior QA Engineer

Who we are:

We are public company with more that 10,500 shareholders, and an enterprise value in excess of $1Bn. As an independent card acquirer and e-money institution, our mission is to deliver services that make the onboarding and payment journey a better experience for both our merchants and their customers, incorporating transparency and security.

We pride ourselves in the security standards we keep for our customers' safety and privacy. We adhere to the most stringent security methods to ensure information is secured to the highest of standards at all times, as well as make sure we adhere to 'privacy by design' principles for the data protection of your business and that of your customers

The Role:

We have an exciting opportunity for a Junior QA Engineer to join us in our Nicosia office in Cyprus.

We are looking for an enthusiastic professional who can design, develop and execute exploratory and test scenarios to ensure quality of iSignthis products. Our ideal candidate will be responsible for conducting tests before product launches to ensure that software runs smoothly and meets client needs, while being cost-effective. Also provide after-hours technical support on a rotation basis.

Responsibilities include (but are not limited to):

- Review requirements, specifications and technical design documents to provide timely and meaningful feedback

- Create detailed, comprehensive and well-structured test plans and test cases

- Estimate, prioritize, plan and coordinate testing activities

- Identify, record, document thoroughly and track bugs

- Perform thorough regression testing when bugs are resolved

- Develop manual and automated test cases to increase regression coverage as well as new functionality testing

- Execute manual and automated test cases including ad-hoc and exploratory testing as needed

- Liaise with internal teams (e.g., developers and product managers) to identify system requirements

- Monitor debugging process results

- Track quality assurance metrics, like defect densities and open defect counts

- Stay up-to-date with new testing tools and test strategies

- Create documentation for all technical workflows

- Provide technical support on a 24/7 basis with a weekly rotation between team members. On-call.

Skills and Requirements:

- BS/MS Degree in Computer Science, Engineering or related field

- Knowledge of Java language

The Package:

- Competitive Salary
- Private health insurance plan participation
- Performance Bonus, including mix of cash and share-based scheme of company stock for outstanding performers.

How to Apply
